Oracle JD Edwards EnterpriseOne

Investment. Delivery. Proof

“...we have an extremely satisfied group of JD Edwards customers and our intent is to continue to invest in, enhance and improve that product line ... and simultaneously giving you a graceful bridge so if you chose to move to Fusion this year or ten years from now ... you have that option.

But we’re certainly not going to induce you to move to Fusion by de-investing in JD Edwards. That’s something we’re going to invest in this year, next year, five years from now, ten years from now ... that’s a very important and strategic product line for us.”

Larry Ellison – CEO – Oracle Corporation – speaking at Oracle OpenWorld 2012

JD EDWARDS WORLD

A9.3.1

Planned

Financial Application Update

- Posting enhancements to provide more detail warning and error enhancements
- Sub-Ledger, additional purge criteria and view/inquiry usability enhancements.

Fixed Asset Management

- Allow an asset's monthly depreciation expense to be allocated to multiple business units automatically.
- Enhance Fixed Asset Management to include capture, management and reporting of internal warranties associated with their fixed assets.

Human Capital Management

- Batch interfaces including employee, applicant, and deduction/benefit/accrual information.
- Vertex Q Series for Canadian Payroll Tax

Inventory Management

- Eliminate manual processes in World Distribution and Engineering and Construction modules

Purchase Card Management

- Allow an asset's monthly depreciation expense to be allocated to multiple business units automatically.
- Enhance Fixed Asset Management to include capture, management and reporting of internal warranties associated with their fixed assets.

Interoperability-Manufacturing

- Batch interface for interoperability to World Plant and Equipment Manufacturing
- Batch interface for interoperability to World Quality Management

Field Level Security

- Mask World data at a Table/Column level by leveraging new functionality provided in the IBM i-Series 7.1i Operating System release.

JDBC Driver Phase III

- Enhancements to JDBC Driver to stay current with JDBC 4.0 standards,
- Adopt additional security capabilities, & fulfill requirements for use with other Oracle products.

Expanded Support for BIP APIs

- Add support for additional BIP API's that are not supported by World.
- Promote increased and effective adoption of BI Publisher by World customers

Applications, Reports and Report Components

The screenshot displays the Oracle JD Edwards EnterpriseOne One View Reporting interface. On the left, the 'One View Customer Ledger Inquiry' application is shown with a table of records. The main area displays a 'Customer Account Balance Analysis' report for the date 2011-06-30, featuring five regional gauges, a pie chart for 'Open Amount by Region', and a horizontal bar chart for 'Top 10 Payors by Open Amount'. A legend for the bar chart lists various companies like Capital System, Creek Corporation, Pacific Company, Myers Corporation, Lead Company, and Pine Ridge. A 'Report Components' box highlights the bar chart, and a 'Reports' box highlights the entire report area.
